## **DETAILED ACTION**

### ***Election/Restrictions***

1. The previous election of species, paper No. 8, mailed 4/24/2003 incorrectly stated claim 8 as a generic claim. That election is withdrawn and a new election requirement follows.

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

3. The species are as follows:

- Species I--Figures 1, 2, 9 and 13;
- Species II--Figure 3;
- Species III--Figure 4;
- Species IV--Figures 5a and 5b;
- Species V--Figures 6, 7, 10, 11 and 14;
- Species VI--Figure 12.

Figures 8a-d and 15 are generic to all Species.

4. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 3754

5. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. The claims are deemed to correspond to the species listed above in the following manner:

- Claims 4, 8 and 10--Species II, III, VI;
- Claims 11 and 12--Species III and VI;
- Claims 13 and 14--Species III;
- Claim 9--Species V
- Claim 15--Species VI

The following claim(s) are generic: 1-3, 5-7 and 23-25. Claim 8 requires the inlet and outlet valve to be independently operable, which is not shown in Species I or IV, so claims 16-22 do not read on any species. If claims 16-22 depended from a generic claim, claims 16, 17, 21 and 22 would correspond to Species I, and claims 18, 19 and 20 would correspond to Species IV.

7. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: A metered valve assembly with an inlet valve reversibly actuable from an open to a closed position and an outlet valve reversibly actuable from a dispensing to a nondispensing position is old in the art as shown by Harris (4,061,251). That which is old cannot be a special technical feature, as a special technical feature must define over the prior art.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3754

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
